

# Living and Nonliving Things

The title is set against a blue background with a rainbow. To the left is a cartoon boy with brown hair, wearing an orange shirt and blue shorts, with his arms outstretched. In the center is a cartoon farmer wearing a brown hat and a yellow shirt, also with his arms outstretched. To the right is a smiling sunflower with a face, and a green guitar with a smiling face.

One kind is called living things. Living things eat, breathe, grow, move, reproduce and have senses. The other kind is called non-living things. Non-living things do not eat, breathe, grow, move and reproduce. They do not have senses.

1. Living things need food to obtain energy, to grow and to stay healthy. Plants make their own food by the process of photosynthesis. Animal get their food from plants and other animal.

2. Non-living things that are not alive and they do not need food to grow.
