    a.  Global Positioning System
    b.  Grand Positioning System
    c.  Global Pioneer System
    d.  Global Positioning System

5.   Online means being connected to <u>Internet</u> .

a. Each Other
b. Internet
c. News websites
d. Another computer

B. **Write steps to do the following** :-

1. **Print a selected portion on a web page.**

   To print a selected portion of web page , we follow these steps :-

   1. Select the text , we want to print.

   2. Go to file on the menu bar , and click Print.

   3. In the page range section of the print dialog box , click the radio button next to selection.

   4. Click Print.

2. **Copy an image from a web page to an MS Word Document**

   To copy a picture from a web page , we follow these steps :-

   1. Place the mouse pointer on the picture.
   2. Right click and Select "Save Picture As......" from the menu that appears.
   3. In the Save As dialogue box , locate the folder where you want to save the picture and give a appropriate name.
   4. Click ok.

3. **Answer the following questions :-**

   1. How is GPS system useful ?

Ans :-   The global positioning system (GPS) is a network of satellites and receiving devices used to determine the location of something on Earth.

The GPS system is useful in many ways as :-
- GPS is extremely easy to navigate because it tells you to direction for every turns you're taking otherwise you need to fancy reach to your destination.
- GPS costs you very low as compared to other navigation systems.
- It also helps you to look nearby restaurants, hotels and gas stations and is extremely useful for a replacement place.
- GPS are often used anywhere within world, it's powered by world satellites, so it are often accessed anywhere, a solid tracking system and a GPS receiver are all you would like.

**2. Write a short note on online T.V .**

Ans :- Online TV generally delivers the same televised content as live streaming content on end-user devices. Instead of coming home in the evening and turning on their cable or satellite TV programming, internet TV viewers stream, or receive a ''flow'' of content, by relying on their internet connection

The title is pretty self-explanatory; online video is taking over, live regular TV is diminishing in ratings. With that in mind, here are five reasons why online T.V is becoming useful :-

1. Available to Watch; Anytime, Anywhere.
2. No Wasted Hours of Programming.
3. Content in the Hands of Creators.
4. User Interaction.
5. Competition Becomes Collaboration.

**3. Write two points why online news has become so popular.**

Ans :-  Two points which shows that online news has become popular are :-

1. Easier to Access:

Online news is faster and easier to access. The person doesn't have to go to the store to read the newspaper. Worldwide news is available on the site. The content in the online news is well organized for the readers. The readers won't face any problem in searching for the information required.

2. Cost-Efficient:
The readers can save their money as the newspaper doesn't have to be purchased if news is available on the site. The website doesn't add the print cost. The reader can have access to news whenever and wherever they require for free of cost.

**4  write two advantages of online Testing.**

Ans :- An online examination system has plenty of advantages:

- It saves paper.

You never have to print an exam for your students and hand them out. Saves paper. Saves trees. Everybody happy.

- It saves time.

You can setup an exam in such a way that it will auto-grade itself. If you only use multiple choice questions you never have to check an exam again. The online exam system will take care of that hassle. Completely automated.

**5  What is Cloud computing ?**

Ans :- Cloud computing is a general term for anything that involves delivering hosted services over the internet. A cloud can be private or public. A public cloud sells services to anyone on the internet. A private cloud is a proprietary network or a data center that supplies hosted services to a limited number of people, with certain access and permissions settings. Private or public, the goal of cloud computing is to provide easy, scalable access to computing resources and IT services.

**6  Write names of two companies that offer cloud services and state the service that they offer.**

Ans :- The names of two companies that provides cloud services are :-

- Amazon Web Service (AWS):-

  Amazon Web Services is a cloud computing platform that provides services such as compute power, database storage, content delivery and many other functions which will help to integrate a business.

- Microsoft Azure

  Microsoft Azure is a cloud computing service which is used for building testing deploying and managing the application. This process is done in a global network of the Microsoft-managed data centre. It is private as well as a public cloud platform.

**7   write two challenges that the recruiters using online Testing face .**

Ans :-  The challenges that the recruiters faces during online Testing are :-

1. There's too much noise in the market, making it hard to grab candidates' attention.
2. Testing candidates' skills accurately and fairly can be tricky.
3. Recruiters sometimes lack the technical knowledge needed to answer candidates' questions.
