CHAPTER – 8

CLASS I

WATER WE DRINK.

Water is very important for us. All living things need water to live. We cannot live without water.

Sources of water:-

- Rain is the main source of water.
- Surface water - river, ponds, lakes, and oceans
- Ground water - rainwater that seeps into the ground

Well

Rain

River

Tap

Lake

Stream

Saving water :-

- Do not waste water while bathing.
- Get leaking taps fixed.
- Never keep the tap open while brushing the teeth.
- Use a bucket and a mug for bathing instead of a shower.

Keeping water clean:-

We should drink clean and pure water. We should boil and filter water before drinking it. Dirty water can cause diseases. Boiling kills the germs present in the water.

- Water is very precious. We should not waste it. We should not make our water bodies dirty.
